

PANELPIEDRA KRETTA BURNIND

HD-Black Laser Clichè for Pad Printing

Our PKB-30 HD Laser machine allows you to create your own plates, you can do it at an unbeatable speed, at low cost and without transmitting sensitive information to third parties.

Laser cliché advantages:

No need to make movies anymore (Film)

No more UV exposure! (UV exhibitor)

No more washing the engraving!

No more drying after exposure!

No need to use chemicals! (Alcohol or acids)

Easy control of the plate depth with a click

The process of making the cliché is very fast compared to current techniques (photoengraving)!

Perfect repeatability when making a new cliché is in the positioning of the incision and both in the depth of the cliché!

Perfect positioning of the engraving when working with multicolor machines.

Setup time for multicolor jobs will be minimized.

Possibility to engrave once the cliché plate is already engraved, so that you can use the plate surface optimally!

Duration of the Clichè: about 15,000 prints

Respectful of the environment
